

September 17, 2018

Dear Neighbor,

Lyndon Township is embarking on a huge project to bring fiber internet to the community, and Midwest Energy & Communications (MEC) is honored to serve as your Internet Service Provider (ISP).

On Oct. 9 we are hosting an event at the Rod & Gun Club, 7103 Ligane, Chelsea, to introduce our service and some of our team members. We'll dish up a picnic dinner from 4-6 p.m. and our team members will be available from 4-7 p.m. This is a great opportunity for the local community to enjoy some food and fellowship, meet the MEC team, and most importantly, learn more about fiber internet and sign up for service.

Interested in joining us? Please RSVP at teammidwest.com/lyndon by Oct. 3.

Who is MEC? Thanks for asking! We are an electric cooperative based in Cassopolis, MI with roots dating back to 1937. We brought electricity to the rural space when the incumbent utilities would not, and are now reliving that story by bringing a high-speed internet option into our rural service territory. In 2015 we launched a five-year plan to deploy fiber internet across southwest Michigan, and are now nearly 8000 consumers strong and growing. This gold-standard technology is bringing new levels of comfort, convenience and connectivity, and changing the way people work and play. We've received local, regional and national attention for our efforts and service, and are eager to introduce it in Lyndon Township.

For your convenience, we have enclosed an informational flyer about the new service. You can also learn more at teammidwest.com/internet. We appreciate the opportunity to partner with Lyndon Township on this important service, and look forward to providing you a fiber-fast internet experience.

Sincerely,

Your MEC Fiber Internet Team
